EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

The following informal examiner's amendments have been made:

Page 1, lines 3-4, "now U.S. Patent _____" has been changed to --now U.S. Patent 6,197,595--.

In claim 97, line 1, "claim 97" has been changed to --claim 96--.

2. The following is an examiner's statement of reasons for allowance:

With respect to claim 90, the prior art of record fails to teach or fairly suggest a microfabricated device that includes two chambers connected by at least one common channel and the chambers are in fluid connection with at least one vent port and one pressure inlet and at least one chamber includes a diaphragm valve and wherein an aliquot of fluid is created by controlling the flow between the chambers and the pressure differential used to move the fluid is created using the diaphragm valve and vent port.

With respect to claims 92 and 117, the prior art of record fails to teach or fairly suggest the claimed method that include the use of two microfabricated chambers connected by at least one common channel and in communication with a sealable closure inlet and at least one

Art Unit: 1744

chamber in communication with a vent port wherein the device also includes a valve such that an the control of the valve and vent port with respect to a pressure differential allow the volumetric chamber to be filled and an aliquot of fluid in the volumetric chamber be displaced to the second chamber.

Additionally note obviousness-type double patenting has not be made with respect to the claims of Patent No. 6,043,080 and No. 5,856,174 since the instant claims do not dominate any of the patented claims and the patented claims are silent as to any methods or devices that involve the creation of an aliquot of a fluid.

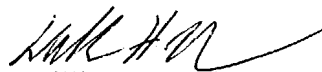

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Beisner whose telephone number is 571-272-1269. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:15am to 3:45pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Warden can be reached on 571-272-1281. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
